To Whom It May Concern:

This is a letter of recommendation for Jorge Martinez who worked part time for Ingeciber as student making practices from March 4 2008 until June 30 2009.

Jorge Martinez worked under my supervision at Ingeciber, S.A. During this period, he had the following functions:

- Learning Knowledge in C++, C#, HTML, XML for the R+D Project CivilFEM
- Acquisition of some knowledge in civil engineering, the method of finite elements, and handling of the software ANSYS
- Teamwork and use of management software projects: Sourcesafe.

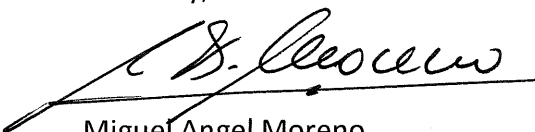

Jorge Martinez is a hard – working self – starter who invariably understands exactly what a project is all about from the outset, and how to get it done quickly and effectively. During his stay here, I cannot remember an instance in which he missed a major deadline. He often brought ideas and initiatives to improve our work here.

Mr. Martinez is a resourceful, creative and solution – oriented person who was frequently able to come up with new and innovative approaches to his assigned projects. He functioned well as a business orientated person when required, and he worked effectively as a team member under the direction of other team leaders.

On the interpersonal side, Jorge Martinez has superior written verbal and communication skills. He gets along extremely well with the colleagues at his own level, as well as with the staff up to him.

In closing, if any other question is necessary, please do not hesitate in contact me again.

Sincerely,

Miguel Angel Moreno

CEO Ingeciber SA
